ZERO TOLERANCE

THE VIRBAC PARASITOLOGY RANGE

A comprehensive portfolio of parasitology products specifically innovated with the needs of both you and your clients in mind. The Zero Tolerance Range facilitates tailor-made parasite protocols that consider the individual parasite protection requirements of each pet.

Shaping the future of animal health

Virbac

Experience you can trust

Shaping the future of animal health

Virbac's veterinary heritage means we consider animal health just as you do, always putting the patient at the centre of our approach.

For over 50 years, we have supported the veterinary profession with a range of parasitology diagnostics, preventatives and treatments that put vets in control of treatment.

As part of our commitment to animal health, we strongly advocate for the responsible use of veterinary medicines. For anti-parasitic medicines to be effective and to avoid negative outcomes, precise dosing, correct application, and proper disposal are vital.

Responsible parasite control safeguards animal welfare, public health and helps protect the environment.

Tailored and targeted action

Virbac Zero Tolerance: Elevating Responsible, Tailored Parasite Care

As UK regulations shift toward individual risk assessments and away from routine blanket treatments, the Virbac Zero Tolerance range helps your practice deliver responsible, evidence-based parasite control tailored to each patient's specific lifestyle.

Risk-Based Clinical Decisions: Move beyond one-size-fits-all coverage. A quick discussion with pet owners pinpoints specific risk factors—such as homes with young children or elderly adults, or dogs with inquisitive, scavenging natures—allowing you to prescribe targeted roundworm, lungworm, or flea protocols only when clinically necessary.

Adaptable Dispensing Options: The flexible Zero Tolerance portfolio allows your clinical team to easily dispense the exact active ingredients and treatment frequencies required for each pet's unique risk profile.

Future-Proofing Your Practice: Aligning your parasite protocols with upcoming UK regulatory expectations positions your team as leaders in responsible prescribing, protecting both pet health and the environment while maintaining strong client trust.

*8 months for ticks, 7-8 months for adult fleas.
** Kynetec VetTrak Data Sept 2026 (veterinary channel sales)

COMBINATION

1 Prinovox®

KEY FEATURES & BENEFITS

- **Tried and trusted** combination of imidacloprid and moxidectin
- **Wide spectrum** of activity against parasites (fleas, mites, lice, lungworm, heartworm, roundworm)
- **Spot-on solution** for lungworm (treatment and prevention)
- **Routine treatment** for fleas
- **POM-V** to retain veterinary business
- **Unique support package** to encourage compliance
- Approved for use in dogs **>1 kg and over 7 weeks of age**
- Approved for use in cats **>1 kg and over 9 weeks of age**

Prinovox Spot-on for dogs for the treatment and prevention of fleas, lungworm and differing stages of heartworm and treatment of lice, mites and roundworm.

Prinovox Spot-on for cats for the treatment and prevention of fleas, the treatment of mites and roundworm and the prevention of heartworm.

Presented in bright packaging Prinovox offers vet practices a unique new business opportunity - with equivalent efficacy to the referenced product for all indications.

isfm easy to give
www.icatcare.org/vets

“Switching to four packs hasn’t been a problem. We have seen more people coming back on time and animals getting better treatment through better compliance.”

Silverton, Paignton

“We have had absolutely no problems swapping to Prinovox. **The POS materials provided by Virbac have been very helpful** in the transition.”

VetsKlinic, Swindon

“Customers are happy that the practice is looking for alternative products with equivalent efficacy but at a reduced price.”

Milestone, Devon

“Having one pack size is quicker for reception as they do not need to go through different price options. There has been absolutely no issue about clients wanting to stick with a familiar brand. We explain the product is the same.”

Castle Vets, Grazely

“It has been a seamless switch! Prinovox saves our customers (and us) money. We have also **benefited by joining the Virbac loyalty scheme** which has helped all the other products we currently stock.”

Cranbrook, Devon

2 MILPRO

Milpro is a broad-spectrum wormer containing milbemycin and praziquantel in palatable tablet form, which offers protection against parasitic worms of dogs and cats, including roundworm and tapeworm.

Milpro is also licensed for the prevention and treatment of *Angiostrongylus vasorum* in dogs.

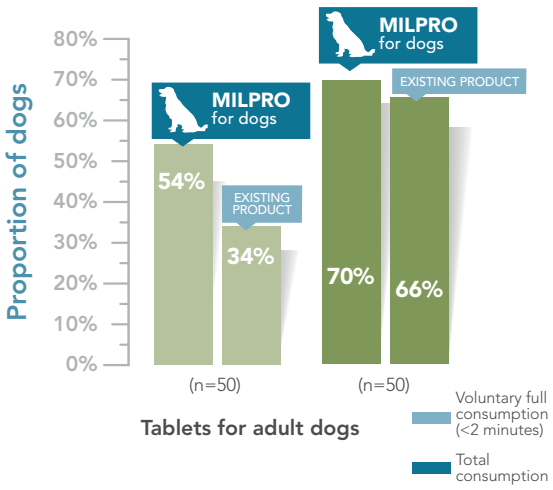

KEY FEATURES & BENEFITS

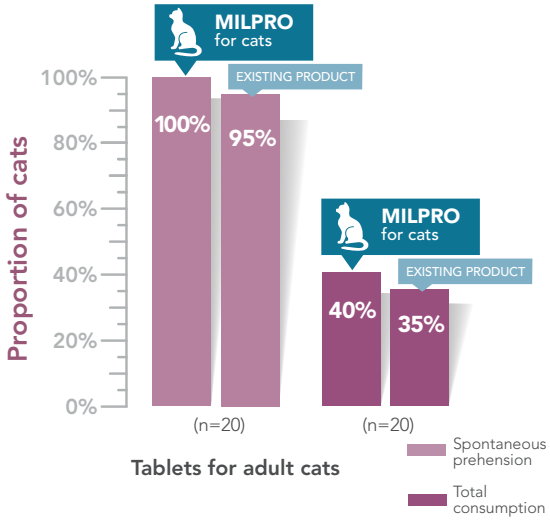

- **Meat-flavoured film-coated tablets** for palatability and ease of administration
- **Range of tablet and pack sizes** for puppies, dogs, kittens and cats to provide flexible dispensing
- **Tablets scored** on both sides of cat tablets for easy dosing
- Approved for use in dogs **>0.5kg and over 2 weeks of age**
- Approved for use in cats **>0.5kg and over 6 weeks of age**
- **Manufactured by Virbac** which helps to aid the control of reliable supply
- **POM-V**

Milpro is proven to be highly palatable in dogs and puppies[1]

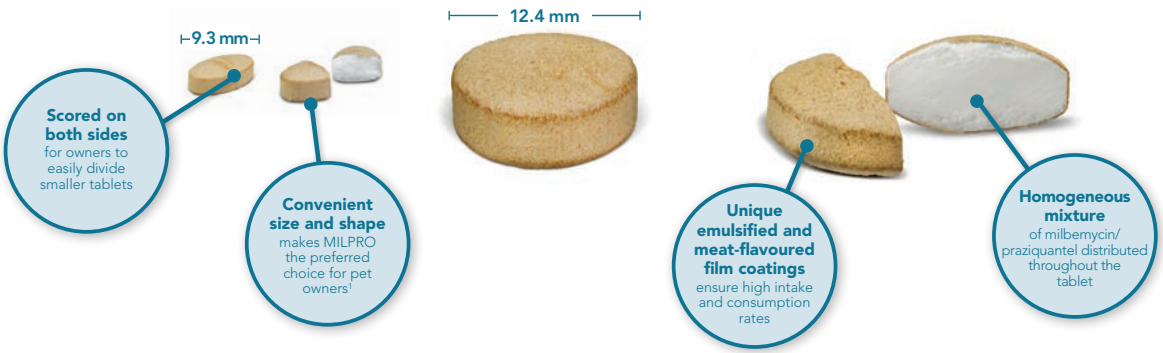

The palatability of Milpro for cats is equivalent to that of existing milbemycin/praziquantel product[2]

Innovative meat-flavoured film-coated tablets

3 Endogard®

Endogard is a broad-spectrum wormer that protects against most types of intestinal worms commonly found in dogs, combining febantel, pyrantel and praziquantel.

KEY FEATURES & BENEFITS

- **Powerful formulation of three active ingredients:** praziquantel, pyrantel and febantel
- **High safety margin**
- Can be used during the **final third of pregnancy and throughout lactation**
- Approved for use in **dogs >2kg and over 2 weeks of age**
- **NFA-VPS**

2 tablet sizes for easy dosage.

For small and medium sized dogs under 35 kg, use 1 tablet of Endogard Plus Flavour per 10 kg of bodyweight. For larger dogs use 1 tablet of Endogard Plus XL per 35 kg of bodyweight.

4 Prazigard®

Prazigard is highly effective against all common UK dog tapeworm species, including *Echinococcus granulosus* and *Dipylidium caninum*, targeting both immature and mature forms.

KEY FEATURES & BENEFITS

- **Optimal Safety Profile:** Licensed for use in pregnant females, offering confidence for treating a wide range of patients.
- **Flexible Administration:** Tablets can be administered directly or mixed with food, offering a simple solution for difficult-to-pill dogs and reducing client frustration.
- **AVM-GSL**

INGREDIENTS

- Praziquantel is a powerful anthelmintic medication specifically designed to combat tapeworms. Its effectiveness for dog tapeworm control stems from its unique and rapid mechanism of action.

FLEA & TICK

5 PREVEXTO

Prevexto is a long-lasting parasiticide collar designed to provide continuous protection against fleas and ticks for cats and dogs for up to 8 months*, offering your clients a reliable and cost-effective solution.

KEY FEATURES & BENEFITS

- **Affordability** Providing a more cost-effective solution than the market leader or alternative flea & tick treatments.
- **Proven Efficacy** Kills fleas and both repels and kills ticks.
- **Increased Compliance** Up to 8 months* of protection with a single collar, making parasite protection easier for your clients.
- **Target Species** Suitable for both cats and dogs. Ideal for multi-pet households.
- **Continuous Diffusion** Slow release of the molecules from the polymer matrix.
- **Head to Tail Protection** Active ingredients flumethrin and imidacloprid are distributed through the lipid layer.
- **Comfortable Collar** Non-greasy, soft and fits all breeds and sizes.
- **Safety Equipped** Controlled expansion mechanism widens the collar if a pet gets trapped. The «V» breakaway point also on cat and small dog collars, prevents choking.
- **Perfect Partners** Combine Prevexto™ and Milpro® to provide complete parasite control.
- NFA-VPS

INGREDIENTS

- Flumethrin and imidacloprid.

*8 months for ticks, 7-8 months for adult fleas.

FLEA & TICK

6 EFFIPRO® DUO

KEY FEATURES & BENEFITS

- **Broadens coverage** to target key developmental steps within the flea life cycle
- **Kills adult fleas and ticks** without the need for a blood meal
- **Provides 12 weeks of protection** against flea life cycle completion
- **Sterilises adult fleas and inhibits immature stages**, which breaks the flea life cycle and helps prevent reinfestation
- Available in **packs of 4**
- Approved for use in **dogs >2kg and over 10 weeks of age**
- Approved for use in **cats >1kg and over 10 weeks of age**
- **NFA-VPS**

ISFM easy to give
www.icatcare.org/vets

A useful tool in any integrated flea control programme. Effipro Duo is a spot-on that gives optimal protection against fleas and ticks on dogs and cats while preventing fleas from infesting their homes. Effipro Duo contains two powerful active ingredients, pyriproxyfen and fipronil, in an award-winning drop-lock pipette.

UNIQUE DROP-LOCK PIPETTE

- **Easy to snap open** - Effipro Duo is sealed away until your client is ready
- **Easy to apply** - a gentle squeeze is all that's needed
- **Easy to control** - drop-lock technology stops drips and spills
- **Easy to see** - clear chamber shows when a full dose is applied

FLEA & TICK

7 EFFIPRO® SPOT-ON

Effipro is the ideal spot-on flea and tick treatment for dogs and cats, especially those that won't sit still.

The unique award-winning drop-lock pipette lets your customers apply Effipro in just the right place on their pets - with no mess and no fuss - which means better compliance and greater efficacy.

isfm easy to give
www.icatcare.org/vets

KEY FEATURES & BENEFITS

- **Kills fleas on pets within 24 hours, and ticks within 48 hours**
- **Unique drop-lock pipette**
- **Improved compliance** and fewer complaints add up to more repeat business
- Available in **packs of 4 pipettes**
- Approved for use in **dogs >2 kg and over 2 months of age**
- Approved for use in **cats >1 kg and over 2 months of age**
- **AVM-GSL**

Effipro is as effective as the market-leading fipronil product. Effipro treats fleas for up to five weeks in cats and eight weeks in dogs, and ticks for up to two weeks in cats and four weeks in dogs.

Range of sizes available.

HOUSEHOLD

8 Indorex® Defence

KEY FEATURES & BENEFITS

- **2 month adulticide**
- **12 month activity and protection**
- **Pyriproxyfen is UV stable** - works well in sunlit areas such as cars and conservatories
- **Acts on contact**, not ingestion
- **Prevents environmental reinfestation** for up to 12 months
- 1 can treats a **3-4 bedroom home**

Indorex is the UK's no.1 household flea spray*

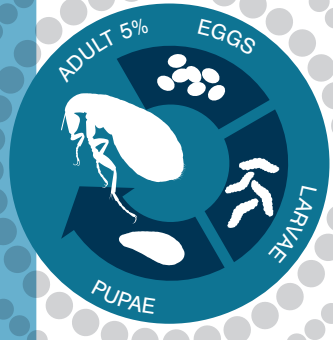

Indorex kills adult fleas and house dust mites on contact for up to 2 months after application, thanks to its unique adulticide formulation, and prevents the development of flea eggs and larvae for up to 12 months.

The 4-stage flea life cycle

Clients are often unaware of the significance of seeing 'a few fleas' on their pets and how hard treating household infestations can be.

By encouraging preventive use of a household flea spray on an annual basis, alongside routine flea control on all pets, we can protect homes from flea infestations.

* Kynetec VetTrak Data Sept 2026 (veterinary channel sales)

Benefits to Your Clients

- **Satisfaction:** Indorex Defence offers excellent, proven efficacy
- **Value for money:** one can of Indorex Defence treats an average 3-4 bedroom home
- **Convenience:** in most cases, Indorex Defence needs to be applied just once a year
- **Trusted:** Indorex Defence has been awarded Best Flea Product (Home) for the 18th time in the Your Dog Magazine 2026 Product Awards. It also claimed the top spot in the same category in the Your Cat Magazine
- **Product Awards:** Indorex Defence has also been voted Pet Product Marketing Flea Treatment of the Year 2026, with retailers and stockists confirming its unchallenged status as the No. 1 household flea spray.

Your Cat PRODUCT AWARDS 2026 WINNER Best Flea Product (for home)

your dog PRODUCT AWARDS 2026 WINNER Best Flea Product (for home)

Pet Product Marketing RETAILER RECOMMENDED AWARDS 2026 WINNER Flea Treatment of the Year

KEY FEATURES & BENEFITS

- **Permethrin & Piperonyl Butoxide**
  Provide synergistic adulticide activity ensuring rapid and prolonged knockdown of adult fleas and house dust mites for up to 2 months.
- **Pyriproxyfen**
  Insect growth regulator for year long control of eggs and larvae.
- **Chrysanthemum cinerariaefolium**
  A source of Pyrethrins, a naturally occurring insecticide.

ZERO TOLERANCE

Prinovox® spot-on solution for dogs contains imidacloprid and moxidectin. POM-V . **Indications for use:** for dogs suffering from, or at risk from, mixed parasitic infections: treatment and prevention of flea infestation (*Ctenocephalides felis*); treatment of biting lice (*Trichodectes canis*), ear mite infestation (*Otodectes cynotis*), sarcoptic mange (caused by *Sarcoptes scabiei* var. *canis*), demodicosis (caused by *Demodex canis*). Prevention of heartworm disease (L3 & L4 *Dirofilaria immitis*). Treatment of circulating dirofilariosis (L3 *D. immitis*).
