Backhome®

Trusted **Microchipping** for Reliable Pet Identification

Microchipping is a vital tool in responsible pet ownership, providing a **permanent**, and **effective** method of identification.

Since the 1990s, millions of pets have been microchipped, and it remains a key requirement of the EU Pet Passport scheme. Whether reuniting lost pets with their owners or ensuring compliance with legal regulations, microchipping plays a crucial role in animal welfare. **BackHome is UK's market-leading microchip***

BackHome microchips come with a reusable implanter.

- **Exclusive Virbac design**
- **Ergonomic implanter** with
  - Large finger loops for ease of use
  - Flattened panel at top of loops for increased comfort
  - Improved grip on body of syringe
- **Sharp, lubricated needle** for effortless implantation
- **Anti-return click system**
  - Reinforced with a unique visual 'check' window
- **Luer-lock system**
  - Allows needle detachment after implantation for safe disposal and less sharps waste

Less plastic, more convenient, same trusted quality.

New & Improved Design:

Less Waste, Greater Efficiency

At **BackHome®**, we are committed to driving sustainability through innovation. Our newly designed packaging:

9x
less plastic

Electronic identification
providing the same permanent and reliable identification and reunification

Reusable implanter
with one injector and 10 separate needles, reducing plastic waste

Smaller packs
which are easier to store and transport with less packaging waste

Manufactured in Europe
to minimise shipping miles as much as possible

Backhome®

BackHome V800 Scanner

Reads ISO11784/11785 FDX-A, FDX-B, and HDX standards chips

Connection to computer: USB and Bluetooth
Scanners are small and compact and therefore ideal for use on the road.

Scanner dimensions: 155mm (L) x 82 (W) x 33 (H)

Rechargeable battery through USB port

BackHome bio-glass mini chips: suitable for use in species of any size

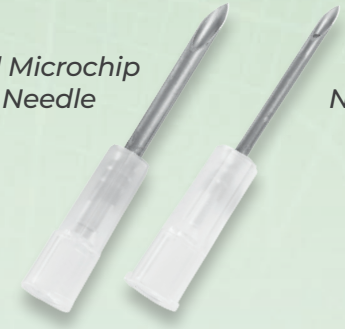

Whether microchipping a dog, a horse or even a snake the BackHome mini chip is a versatile and reliable option that causes minimal discomfort to the animal.

Our mini glass chips conform to ISO standard 11784 and 11785 FDX-B, are manufactured with the latest technology and also boast the following benefits:

- Manufactured using medical-grade bio-glass
- A very small, permanent, silicone dot, holds the microchip securely in place
- All BackHome microchips are coated with medical-grade parylene, to prevent migration
- Microchips are laser sealed and robotically checked to ensure integrity
- A photo is taken of every single needle during assembly to comply with our high quality control standards

The importance of a trusted and reliable database

PETtrac is a UK based, fully compliant reunification service that offers reliable customer service 24 hours a day, 365 days a year.

As part of the purchase price, BackHome provides lifelong registration on PETtrac who can offer our customers excellent and reliable service. The PETtrac reunification database is dedicated to reuniting missing pets with their owners 24 hours a day, 365 days a year.

Fully compliant with DEFRA requirements for compulsory microchipping of dogs and cats.

Compulsory Microchipping Laws

Since April 2016 it has been compulsory in England, Scotland and Wales for all dog owners to have pets microchipped and recorded with a government-compliant database. In Northern Ireland compulsory microchipping became a requirement for a dog licence from April 2012 under the Dogs (Amendment) Act (NI) 2011. It is the responsibility of dog breeders to ensure that puppies are microchipped and recorded by the time they are eight weeks old and before they are sold.

In March 2023 legislation was passed that introduced compulsory cat microchipping. Cats must now be implanted with a microchip before they reach the age of 20 weeks and owner details must be stored and kept up to date in an approved microchip database. Since the 10th June 2024 cat owners have been required to get their cat microchipped and if not done, owners could face a fine of up to £500.

Full information on compulsory microchipping can be found on www.gov.uk

BackHome provides free transfer of keepership from the breeder to the new owner.

Online Registration

10x microchips with 1x reusable implanter.

We've designed our eco packs to be as sustainable as possible. Each sterile sachet includes a needle, a microchip, and barcode labels

Benefits of Online Registration

- **Speed and ease of registration - instant recognition on the PETtrac database - with VetEnvoy compatibility**
- **Reduces the risk of registration documents going missing**

VetEnvoy

BackHome is compatible with VetEnvoy.

This takes the duplication out of manually registering a client online with PETtrac - at the press of a button the details held on compatible practice management software will transfer directly.

Much less time, no mistakes in repeat entry and confidence in registration transfer.
